Education

Malla Reddy Engineering College (MREC)
Bachelor of Science in Computer Science (GPA: 8.40 / 10.00)

May 2025
Hyderabad, Telanagana

Experience

Miraki Technologies Aug 2025 – Present
Workload Automation Engineer Hyderabad, India

- Monitored and managed enterprise batch workloads using AutoSys and Automic UC4 across production environments, ensuring timely execution and SLA compliance.
- Investigated job failures through scheduler and Linux log analysis, performed job recovery, reruns, and dependency validation by following standard operating procedures.
- Collaborated with application, database, and infrastructure teams to resolve production incidents, support change requests, and maintain workflow stability across DEV, UAT, and PROD environments.
- Supported workload automation for multiple enterprise clients by monitoring scheduled jobs, analyzing alerts, maintaining operational reports, and contributing to continuous process improvements.

Salesforce Jan 2024 – Aug 2024
Salesforce Administrator & Developer Virtual Intern Remote

- Configured Salesforce CRM by managing users, profiles, permission sets, validation rules, workflow automation, custom objects, reports, and dashboards while supporting data management, sandbox testing, and application configuration.
- Worked with Salesforce Flow, Process Builder, and Apex fundamentals to understand CRM administration, security models, automation, customization, deployment, and business process optimization through virtual projects.

Projects

CollegePath AI – AI Career Guidance Platform | *Next.js, React.js, TypeScript, MongoDB, Tailwind CSS, OpenAI API*

- Developed a full-stack AI-powered web application that provides personalized career roadmaps, skill recommendations, resume analysis, and interview preparation for students.
- Designed secure authentication, REST APIs, and PostgreSQL database integration using Prisma ORM to manage user profiles, career assessments, and application data.
- Integrated AI-powered recommendations with a responsive user interface, improving user experience through modern frontend architecture and scalable backend services.

CI/CD Pipeline for CollegePath AI | *Jenkins, Docker, GitHub Actions, Nginx, Linux, AWS*

- Designed and implemented an automated CI/CD pipeline for a full-stack web application using Jenkins, GitHub, Docker, and AWS deployment workflows.
- Containerized frontend and backend services using Docker, automated build and deployment pipelines, and configured Nginx as a reverse proxy for production deployment.
- Implemented version control workflows, automated testing, and deployment strategies to ensure reliable software releases with minimal manual intervention.

Automic UC4 Self-Healing Job Automation Framework | *Automic UC4, AutoSys, Linux, Shell Scripting, Email Notifications*

- Designed and developed a self-healing workflow that automatically detects failed jobs, performs predefined recovery actions, and minimizes manual intervention in enterprise batch processing.
- Implemented automated health checks, conditional job restarts, workflow notifications, and execution logging to improve operational reliability and incident response efficiency.
- Integrated Linux shell scripts, email notifications, and workflow dependencies to demonstrate enterprise workload automation, monitoring, and production support best practices.

Technical Skills

Workload Automation: AutoSys, Automic UC4, Job Scheduling, Workflow Automation, Batch Processing, SLA Monitoring, Production Support, Incident Management, Root Cause Analysis (RCA), Change Management,
Technologies & Tools: React.js, Next.js, Nest.js, Express.js, MongoDB, Tailwind CSS, REST APIs, ServiceNow, VS Code, Postman, Grafana
DevOps & Cloud: Git, GitHub, Jenkins, Docker, Kubernetes, Maven, AWS (EC2, S3, CloudWatch), CI/CD, Linux, Nginx, Anisable, Grafana
